SPACCO

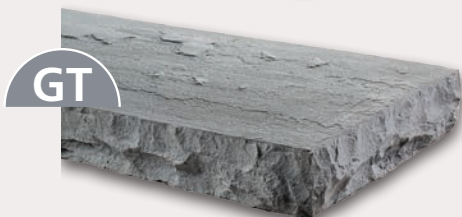

THICKNESS
6,5 cm

Geopietra, having benefited of its development and evolution's desire, is now delighted to introduce the company's **new line, muroplus. muroplus** provides specially-designed accessories for finishing off **murogeopietra**.

Geocover is the main product in the **new muroplus line** and consists of the innovative wall caps designed and produced by the **Geopietra** in-house department **geodo®**. As with **murogeopietra**, the wall cap **Spacco** provides the aesthetics reminiscent of days gone by too.

The **model SPACCO** shown here, (where spacco literally means cut), takes its name from the typical process performed to chisel out the edges, whereas the surface has a natural finish.

The mixture for **geocover** wall caps is made up of contains selected rock granules and high-resistance cement with additives, reinforced with fibre glass.

geocover SPACCO offers the sophistication and authentic appearance typical of the **Geopietra** style.

The cut of the natural stone and its finishing have been reproduced perfectly.
